

Ceramic Braces

Ceramic braces look just like normal teeth and are completely unnoticeable from a distance.

About

Ceramic braces are physically the same structure as metal braces however, the brackets are white to match the colour of your teeth, making it look less obvious that you are wearing them.

Your Consultation

An initial examination is required to see if you qualify for these clear ceramic braces, the shape of your jawline being a determining factor. While ceramic braces may not be suitable for certain misalignment

cases or the complex bite problems ceramic braces can be used to treat overbite problems, crowded and crooked teeth.

Because they are not as strong as metal braces, ceramic braces require a longer treatment time, since we may need to apply a slower, more gradual force to ensure the strength capabilities of the clear brackets are not overtaxed. Inside braces also can take more time to work effectively.

Cost | From \$2,500

Several factors may vary and increase the cost of treatment. We can advise you of the full cost and provide a treatment plan after your first orthodontic consultation.

Paramount Dental Sydney

Dr Amrinder Oberoi

Principal Dentist - BDS Hons. (NZ)

Dr David Graham

Dentist - LDS, RCS (Eng.), MSc (Lon.)
