

Cheek Enhancement

Get an instant lift to the face by returning the cheeks to a higher, fuller and more youthful position with injectable facial fillers.

About

Cheek enhancement results are noticeable immediately and slim the lower face while reducing squareness.

Facial fillers are perfect for patients who don't want to undertake surgery or use permanent implants. There are a number of facial fillers which can be injected into your cheeks and our detailed consultation process here at Paramount Dental Sydney will ensure that you get the treatment that is perfect for your own personal needs.

Procedure | Injections

The procedure begins with icing the entry point followed by a thin injection of local anaesthetic. The remaining injections of the facial fillers will be completely painless.

The amount of facial filler required will vary from person to person, as it depends on the amount of volume loss in your cheek as well as the degree of desired enhancement. There are also options to have longer lasting fillers which are slightly more expensive initially, but provide better value in the long term. Facial filler treatments for cheeks can last for up to 2 years.

Cost | From \$275 Per Area

Several factors can vary and increase the cost of treatment.
