

Dentures

Dentures are a removable device of artificial teeth and gums created to replace missing teeth.

About

The teeth are made out of porcelain or acrylic and held together by an acrylic base, providing a natural appearance. Dentures also support the structures around your cheeks and lips, as missing teeth can cause the facial muscles to droop.

Cost | From \$500

The total cost of your treatment can be affected by several factors. Our team will advise you of these during your consultation.

Procedure

1. An impression of your mouth will be taken
2. After the removal of any teeth, we suggest waiting a few months so that your gums can heal. An immediate denture is also available.
3. Together with your dentist, you can tailor the size, shape and colour of your denture.
4. When it is time for the fitting process, your dentist will let you know if there needs to be any adjustments.
5. Instructions will be given to you on how to best care for your new set of teeth.

What to Expect

Eating and speaking may feel awkward at first but with practice and time, your mouth will soon adapt. Be extra careful with hot food and drinks as it will be difficult to judge temperatures properly.

Paramount Dental Sydney

Dr Amrinder Oberoi

Principal Dentist - BDS Hons. (NZ)

Dr David Graham

Dentist - LDS, RCS (Eng.), MSc (Lon.)
