

# Full Mouth Implants

Dental implants look and feel just like real teeth.

## About

A thorough examination is taken to determine if this is the right treatment for you. Your dentist will ask you questions about your dental and medical history and take detailed images of your teeth.

## Cost | From \$15,000

The total cost of your treatment can be affected by several factors. Our team will advise you of these during your consultation

## Procedure

1. Small rod like implants which look like screws or cylinders are inserted into your jaw.
2. While the implants and the bone are bonding together and forming anchors, the temporary teeth are placed by your dentist.
3. The replacement teeth/bridges will be created for you and attached to small metal posts, called abutments.
