

Porcelain Veneers

Porcelain veneers are a thin but very strong, made to fit over the visible surface of your tooth.

Causes

There are many reasons why your front teeth may require porcelain veneers: Gaps, Stains, Discolouration, Chipped or cracked front teeth, Teeth worn down with age, and Unusually shaped teeth.

Cost | From \$1,200 Per Tooth

Several factors can vary and increase the cost of treatment. Our team will advise you of these during your consultation.

Procedure

1. We will remove a small amount of enamel from your tooth, usually the same thickness as the veneer.
2. An impression is made and sent to a dental technician, who makes the veneer in a laboratory.
3. Each veneer is then bonded to your tooth to make it strong and natural-looking.
